

SPEC SHEET 1007-001-E

Section: 1001 Effective from: July 2010 Replaces: **new**

AM NOYEE Package

The solution for unloading Asphalt, Asphalt Emulsion, Bitumen, Bitumen Emulsion

System concept

ENCLOSED PACKAGE PROVIDES PEACE OF MIND

- Compact, all the components are mounted on tank bulkhead
- No reheating system needed, the pump is submerged into the product
- Multi-purpose, attached valves enables the system to carry out all the necessary operations (see page 2)
- Easy to operate valves, sturdy key supplied, lubrication port to prevent the servo valves from sticking
- Easy to clean system, built-in flushing system
- No maintenance required

Pump concept

RELIABLE SYSTEM

- A-series eccentric disc pump
- Low RPM speed
- Exceptional suction capacity that enables emptying of the piping systems
- Constant flow regardless of viscosity and pressure
- Performance guaranteed over time, clearance compensation device

Up to 176 gpm (40m³/hr)

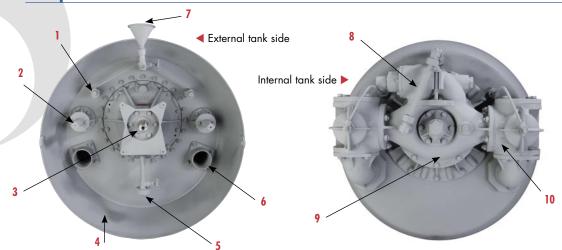

• Performance Characteristics

- Weight (with bare shaft pump) 197kg (528 lbs)
- 3,5 bar (50 PSI) pressure max
- Max T° 200°C (392°F)

- Flow rate :

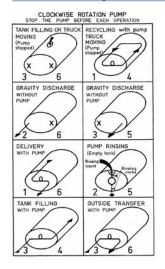

Speed (t/mn)	Flow rate (m³/h)	Power (KW)
350	28 (123 GPM)	5 (6.7 HP)
400	32 (140 GPM)	6 (8 HP)
500	40 (176 GPM)	7.5 (10 HP)

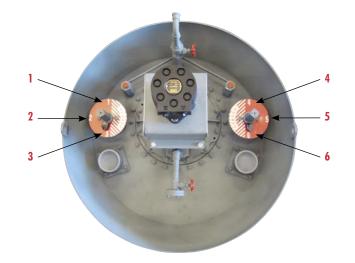

Components

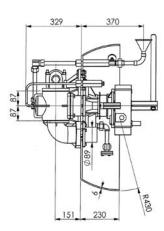

1	Grease nipple (x2)	
2	Valves (x2)	
3	Pump Shaft	
4	Таре	
5	Draining port	
6	Port (x2)	
7	Solvent inlet	
8	By-pass	
9	Pump	
10	3 way valve (x2)	

• Functions/Operation

• Drive Types

Hydraulic drive

Diesel engine drive

Electric motor drive
